SUMMARY

3rd-year Information Technology undergraduate at the University of Moratuwa seeking a Full Stack Developer Internship. Experienced in developing full-stack applications using React, Next.js, Node.js, Express.js, and SQL/NoSQL databases through academic and personal projects. Strong foundation in Data Structures and Algorithms, Object-Oriented Programming, and Agile software development, with an interest in building scalable software solutions.

EDUCATION

BSc (Hons) in Information Technology 2024 – 2028
University of Moratuwa, Faculty of IT · CGPA: 3.26/4.00

Diploma In Information Technology 2023 – 2024
Esoft Metro Campus

G.C.E Advanced Level 2019 – 2021
Bandarawela Central College

TECHNICAL SKILLS

- **Programming Languages:** JavaScript, TypeScript, Java, C
- **Frontend:** Next.js, React, HTML, CSS, Tailwind CSS
- **Backend:** Node.js, Express.js, RestfulAPIs
- **Database:** MySQL, Microsoft SQL Server, MongoDB, PostgreSQL
- **Tools & Practices:** Git, GitHub, Agile, Postman, Figma, Docker

PROJECTS

01.Event Management and Ticketing Micro-SaaS Platform *Individual | Ongoing*

Full-stack multi-tenant event management and ticketing platform featuring role-based access control, atomic ticket reservation, QR code check-in verification, and real-time revenue analytics for organizers and attendees.

Key Contributions:

- Architecting and developing a full-stack micro-SaaS application using React (Vite), Node.js, Express.js, MongoDB, and Tailwind CSS v4 within a monorepo structure.
- Engineering secure Role-Based Access Control (RBAC) and authentication workflows supporting Customer and Event Organizer roles using JWT, HTTP interceptors, and React Context.
- Developing an atomic ticket booking and inventory management engine to prevent race conditions and handle concurrent seat reservations.
- Implementing client-side digital ticket generation with dynamic QR code rendering (qrcode.react) and gate check-in token verification workflows.
- Designing and integrating an Organizer Dashboard featuring event publishing, real-time ticket sales tracking, and automated 5

Tech: React (Vite), Node.js, Express.js, MongoDB, Mongoose, Tailwind CSS, Axios, JWT, REST APIs
Repository: GitHub

02.CoreHead-Multi Tenant Blog Builder *Group | 2026*

Full-stack multi-tenant website builder that enables users to create, manage, and publish customizable websites with AI-assisted and manual layout generation, flexible themes, content management, and role-based access control.

Key Contributions:

- Developed full-stack features for a multi-tenant CMS using Next.js, TypeScript, Node.js, Express.js, PostgreSQL, Prisma, and Tailwind CSS.
- Built post authoring and rich-text editing workflows with draft, scheduled publishing, SEO metadata, and custom image controls using ReactQuill.
- Implemented subscriber newsletter notifications with automated HTML email delivery using Nodemailer and SMTP.
- Developed comment management and moderation, hierarchical category management, and dynamic tenant-aware public pages.
- Implemented and tested RBAC and tenant-level data isolation across Admin, Author, Editor, and Owner roles

Tech: Next.js (React 19), Node.js, Express.js, PostgreSQL, Prisma ORM, ReactQuill, TypeScript, Tailwind CSS
Repository: Frontend | Backend

03.Personal Portfolio Web Application *Individual | 2026*

Responsive, high-performance portfolio application built with React 19, TypeScript, Vite, and Tailwind CSS v4 to showcase full-stack projects, verified certifications, and interactive contact pipelines.

Key Contributions:

- Developed a scalable, typed frontend architecture leveraging React 19, TypeScript, and Tailwind CSS v4 with fluid Framer Motion animations.
- Built accessible modal inspection dialogs for interactive project highlights, live preview links, and credential verification.
- Integrated direct multi-channel contact mechanisms using EmailJS for serverless background email dispatch and dynamic WhatsApp payload generation.

Tech: React 19, TypeScript, Vite, Tailwind CSS V4, Motion, EmailJS, Lucide React
Repository: GitHub | Live Demo: Portfolio

04.BLIMAS - Bolgoda Lake IoT-based Monitoring and Alert System *Group | 2025*

Collaborated with 5-members to build IoT-based environmental monitoring system designed to collect and transmit real-time environmental data from Bolgoda Lake.

Key Contributions:

- Integrated three DS18B20 temperature sensors with ESP32 using the OneWire protocol and assigned unique addresses for depth-wise monitoring
- Configured and calibrated DHT22 for ambient temperature and humidity measurement
- Structured and tagged sensor data with depth identifiers and timestamps for reliable transmission and storage
- Conducted sensor reliability and accuracy testing and implemented handling for missing or invalid readings

Tech: ESP32, Embedded C, OneWire, DHT22, DS18B20, LoRa

LEADERSHIP & COLLABORATION

IEEE Student Branch, University Of Moratuwa

- Beyond the Pages 1.0 - Programme and Logistics Committee Member

LEO Club, University Of Moratuwa

- Knights - Organizing Committee Member
- AurorAWE - Finance Committee Member

Mora Hiking Club, University Of Moratuwa

- Logistics Committee Member

D.S.Senanayaka National School, Ampara

- Hockey Team Player - Represented the school in inter-school competitions

INTERPERSONAL SKILLS

- Leadership and initiative in team environments
- Strong analytical and problem-solving skills
- Effective communication and collaboration
- Adaptability and continuous self-learning mindset
